

EMT COUPLING

SET SCREW TYPE – STEEL

Description:

EMT Steel Set-Screw Couplings are designed to securely join two lengths of EMT conduit in a continuous raceway. Manufactured from steel with an electro-galvanized finish for corrosion protection, they provide a strong and reliable connection. The set-screw design allows for quick installation and secure conduit retention.

- **Material:** Steel
- **Finish:** Zinc plated
- **Type:** Set screw
- **Application:** EMT conduit to EMT conduit
- **Location:** Dry locations
- **Packaging:** Master Carton + Inner Carton (Small Sizes) + Inner Plastic Bag
