

RIGID CONNECTOR

SET SCREW TYPE – STEEL

Description:

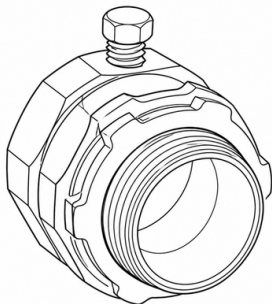

Designed to connect unthreaded RSC or IMC conduit to an outlet box or metal enclosure using a set-screw connection and threaded box entry

- **Material:** Galvanized Steel
- **Finish:** Electroplated
- **Type:** Set Screw Type
- **Conduit:** Rigid Steel Conduit/Intermediate Metal Conduit
- **Application:** Unthreaded RSC/IMC to box or enclosure

VELKOR TIP | Unthreaded

When Rigid Metal Conduit (RMC) or Intermediate Metal Conduit (IMC) is cut to length in the field, the cut end may no longer have factory threads. A set-screw connector allows this unthreaded conduit end to be securely connected to a box or enclosure without field threading the conduit.
