

EMT OFFSET CONNECTORS

COMPRESSION TYPE – ZINC DIE CAST

Description:

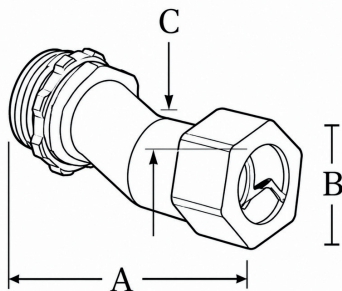

Designed to connect EMT conduit to a metal box or enclosure where an offset is needed. The compression connection secures the EMT without a set screw while providing built-in alignment at the box entry

- **Material:** Zinc Die Cast
- **Type:** EMT to Box
- **Application:** For EMT-to-box connections requiring a compact offset
- **Feature:** Compression design provides even gripping around the EMT conduit
- **Packaging:** Master Carton + Inner Carton

VELKOR TIP:

Compression-type offset connectors provide a cleaner profile without an exposed set screw, making them useful where installation space around the fitting is limited

VELKOR ITEM NO.	SIZE	A (in.)	B (in.)	C (in.)
781	1/2"	2.13	1.00	0.52
782	3/4"	2.90	1.19	0.75
