

EMT CONNECTOR

SET SCREW TYPE – ZINC DIE CAST

Description:

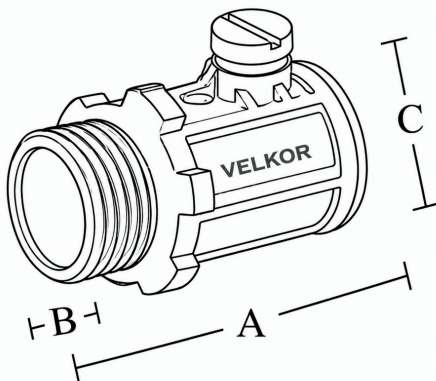

Designed to connect EMT conduit to electrical boxes or enclosures using a set screw for quick and secure installation. Zinc die-cast construction provides good corrosion resistance and dimensional consistency for general electrical applications.

- **Material:** Zinc die-cast
- **Type:** Set Screw Type
- **Application:** EMT conduit to electrical boxes or enclosures
- **Location:** Dry locations
- **Packaging:** Master Carton + Inner Carton (Small Sizes) + Inner Plastic Bag

VELKOR TIP | STEEL vs. ZINC DIE CAST

Steel offers greater mechanical strength and impact resistance, while zinc die cast provides good corrosion resistance, dimensional consistency and cost efficiency. Neither is universally better — the right choice depends on the application.

VELKOR ITEM NO.	SIZE	A (in.)	B (in.)	C (in.)
501	1/2"	1.16	.400	1.06
502	3/4"	1.39	.400	1.30
503	1"	1.55	.520	1.52
504	1-1/4"	1.93	.560	1.95
505	1-1/2"	2.28	.720	1.18
506	2"	2.50	.730	2.64
507	2-1/2"	3.08	.920	3.27
508	3"	3.37	1.050	3.91
510	4"	3.75	1.050	4.99
